Email: prima.psa@gmail.com

ABOUT ME

I'm a developer with experience in building applications using React, Redux, TypeScript or JavaScript. I have experience in back-end development, testing and debugging. I am constantly improving my skills in current technology stack and plan to expand them with new framework like View. In my free time I usually solve tasks on Codewars, read technical literature (K.Simpson, A. Bhargava) and improve my English level.
I'm open to your suggestions.

SKILLS

- React
- Redux
- JavaScript
- TypeScript
- Python
